ON-TIME DELIVERY

91.9%

Monthly revenue, trend and 3-month moving average

Growth has flattened since Mar 2018 — the moving average has been sideways for six months

What moved revenue, last 12 months vs prior 12

Price × volume × mix bridge over the Period window, by default the 12 months to Aug 2018

NET CHANGE — growth is volume-driven; value per order was flat

Revenue concentration by category

The top 8 of 73 categories make 54% — a broad catalogue, not a classic 80/20

category	Revenue	% of Total Revenue	Cumulative Revenue %
health_beauty	R\$ 1,258,681	9.3%	9.3%
watches_gifts	R\$ 1,205,006	8.9%	18.1%
bed_bath_table	R\$ 1,036,989	7.6%	25.8%
sports_leisure	R\$ 988,049	7.3%	33.0%
Total	R\$ 13,591,644	100.0%	

PRIORITY ACTIONS

CRITICAL Retention is the growth ceiling

97.1% of 96,096 customers never place a second order; repeat buyers are 2.8% of revenue.

CRITICAL Service is degrading under growth

On-time delivery fell 5.2 points vs prior 12m while order volume grew 226.8%.

WATCH Value per order is flat

AOV is up 0.9% vs prior 12m, so basket size is flat and growth is volume.

Where customer value sits

Share of revenue by customer decile, highest-spending first

Order value distribution

The average is not the typical order — plan against the median

What retention is worth

Lifetime value per customer, one-time buyers against repeat buyers

KEY FINDINGS

CRITICAL One purchase, then gone

97.1% of 96,096 customers order exactly once. No cohort has topped 0.8% in month one.

CRITICAL Value sits in big baskets, not loyalty

The top decile holds 41% of revenue, but from large one-off orders: 97% of customers buy once.

WATCH Plan against the median, not the mean

Median order R\$85 against a mean of R\$137: a thin tail of large orders pulls the average up 60%.

Does late delivery cause bad reviews?

Each point is one delay bucket; size is the number of orders, measured against the promised date

Where the days actually go

Average days from purchase to delivery, split into seller handling and carrier transit

Review score by delivery outcome

Average stars by how the order actually landed

On-time delivery by state

Gap against the 91.9% national rate — the ten states furthest below

KEY FINDINGS

CRITICAL A small late tail sets the whole score

Orders 8+ days late average 1.73 stars against 4.30 for early ones - a 2.6 star swing.

CRITICAL Two states are structurally broken

Alagoas 76.1% and Maranhao 80.3% on-time against 91.9% nationally, on far longer transit.

WATCH Sellers are not the bottleneck

Handling holds at 3.2-3.4 days in every region while carrier transit swings 7.5 to 19.2 days.

furniture_decor	R\$ 729,762	4.01	91.5%	23.7%	4.20%
cool_stuff	R\$ 635,291	4.17	93.2%	13.2%	1.52%
housewares	R\$ 622,219	4.14	93.1%	23.1%	3.20%
Total	R\$ 13,591,644	4.09	91.9%	16.6%	2.85%

Freight as a share of order value, by basket size

Small baskets do not pay for their own freight — 20% is roughly break-even

Repeat propensity by category

Share of customers who order again, top 12 categories by revenue

KEY FINDINGS

CRITICAL 525 sellers are failing at scale

Above-median volume but sub-4 stars. They carry R\$3.94M - 29% of all revenue.

CRITICAL Small baskets do not pay for their freight

Freight is 78% of order value under R\$25 and 42% at R\$25-50, against a 20% break-even.

WATCH Retention lives in homeware

bed_bath_table 4.32% and furniture_decor 4.20% repeat, against a 2.85% site average.
